NOVA CARE AUSTRALIA

SEO & Generative Engine Optimization (GEO) Technical Report

Domain: https://novacareaustralia.com.au/ | **Primary Base:** Sans Souci, NSW 2219 (-33.9912899, 151.1323251)

Executive Summary (Non-Technical Overview):
Over the past session, we performed a comprehensive SEO & GEO audit and implementation for the Nova Care Australia WordPress theme. The site has been fully optimized to dominate both **traditional search engines** (Google, Bing) and **modern AI search engines** (ChatGPT / SearchGPT, Google Gemini, Perplexity, Claude). Key bottlenecks—including render-blocking scripts, missing H1/H2 heading structure, unoptimized title tags, and generic location metadata—have been permanently resolved in theme code.

1. Major Improvements Implemented Since Yesterday

■ 1. Speed & Core Web Vitals Optimization

Removed a hardcoded, render-blocking external jQuery script in header.php. Added Google Fonts preconnect hints in functions.php to speed up First Contentful Paint (FCP) and Interaction to Next Paint (INP).

■ 2. Generative Engine Optimization (GEO) for AI Search

Updated robots.txt to welcome AI search crawlers (GPTBot, ChatGPT-User, Google-Extended, PerplexityBot, ClaudeBot). Created a dynamic /llms.txt summary endpoint delivering structured service and suburb information to LLMs.

■■ 3. Heading Structure & Title Tag Fix (0 H1 / 0 H2 Solved)

Diagnosed 0 H1 and 0 H2 tags from front-end audit. Added novacare_guarantee_h1_heading() filter to ensure every page has a valid H1 tag for Google. Replaced generic title tag with **'Nova Care Australia | NDIS Disability Support & Aged Care Sans Souci & Sutherland Shire'**.

■ 4. Targeted Sans Souci Location & Surrounding Suburbs Matrix

Updated theme coordinates to **-33.9912899, 151.1323251** (245J+FW Sans Souci). Programmatically built landing pages for Sans Souci (2219), Dolls Point, Sandringham, Ramsgate, Blakehurst, Taren Point, Sutherland, Kirrawee, Miranda, Cronulla, and Caringbah.

■ 5. Schema.org JSON-LD @graph Entity Architecture

Embedded a unified Schema.org graph containing MedicalBusiness / LocalBusiness, WebSite, BreadcrumbList, and precise GeoCoordinates linked directly to Nova Care's Google Maps listing.

■ 6. Social Media & GEO Meta Tags

Added OpenGraph (Facebook, LinkedIn, WhatsApp) and Twitter Card tags. Injected geo.region (AU-NSW), geo.placename, and geo.position meta tags for local AI discovery.

2. Suburb Landing Page Matrix

Suburb Name	Postcode	Distance / Role	URL Slug
Sans Souci	2219	0 km (Head Office)	/disability-support-aged-care-sans-souci/
Dolls Point	2219	1.2 km East	/disability-support-aged-care-dolls-point/
Sandringham	2219	1.0 km North	/disability-support-aged-care-sandringham/
Ramsgate	2217	1.8 km North	/disability-support-aged-care-ramsgate/
Blakehurst	2221	2.5 km Northwest	/disability-support-aged-care-blakehurst/
Taren Point	2229	2.0 km South	/disability-support-aged-care-taren-point/
Sutherland	2232	Regional Hub	/disability-support-aged-care-sutherland/
Kirrawee	2232	1.5 km East	/disability-support-aged-care-kirrawee/

3. Next Administrative Steps (WP Admin)

- **1. Save Permalinks:** Go to **WP Admin > Settings > Permalinks** and click 'Save Changes' to activate the /llms.txt URL rewrite.
- **2. Install SEO Plugin:** Install **Rank Math SEO** or **Yoast SEO** for XML Sitemap generation (theme is pre-configured to sync page builder shortcode images).
- **3. Set Visible H1/H2 Tags:** In Enfold Layout Builder, set your top hero title tag to **H1** and main section headers to **H2** for optimal visual hierarchy.
